Intermountain Healthcare 2026 Generative AI Hackathon

Made with Prezi

A Broken Process at Scale

- Microsoft Form submissions route to a shared email inbox, creating a bottleneck.
- Staff manually triage, interpret, and enter data into Excel, prone to errors.
- Result: Inconsistent data, fulfillment delays, zero visibility into demand trends or staffing needs.
- As demand for Community Health grows, this manual model is not scalable.

Made with Prezi

How It Works Today

A manual, costly, and error-prone process

Community Partner Submits

Community Partner fills MS Form. Cost: Time Lost.

Email Inbox & Manual Read

Email hits shared inbox; staff manually reads and interprets. Cost: Errors Introduced.

Data Entry to Excel

Staff enters data into Excel. Cost: No Audit Trail.

Manual Fulfillment & Follow-up

Staff determines fulfillment type and follows up manually. Cost: No Visibility.

Made with Prezi

An AI-Powered End-to-End Request System

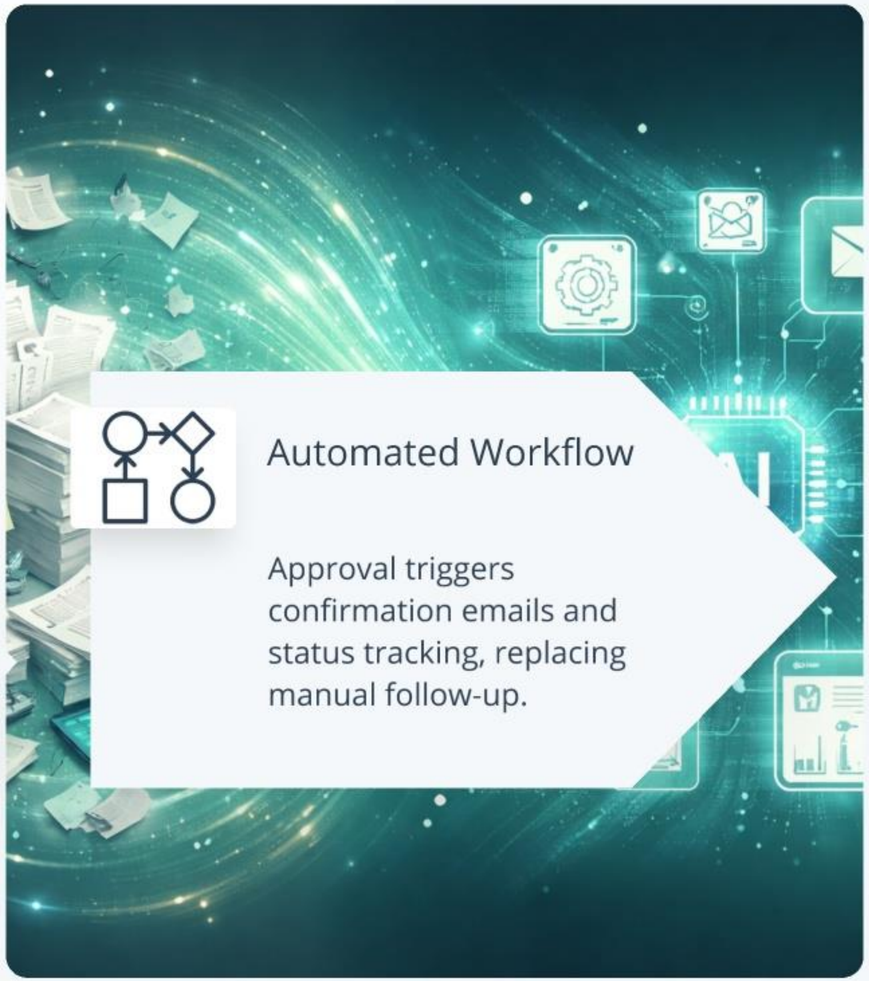
Streamlining intake, intelligence, and automated fulfillment

Conversational AI Intake

AI-powered chatbot guides users, interprets free text, and validates data.

Intelligent Admin Queue

A real-time dashboard surfaces requests with AI summaries.

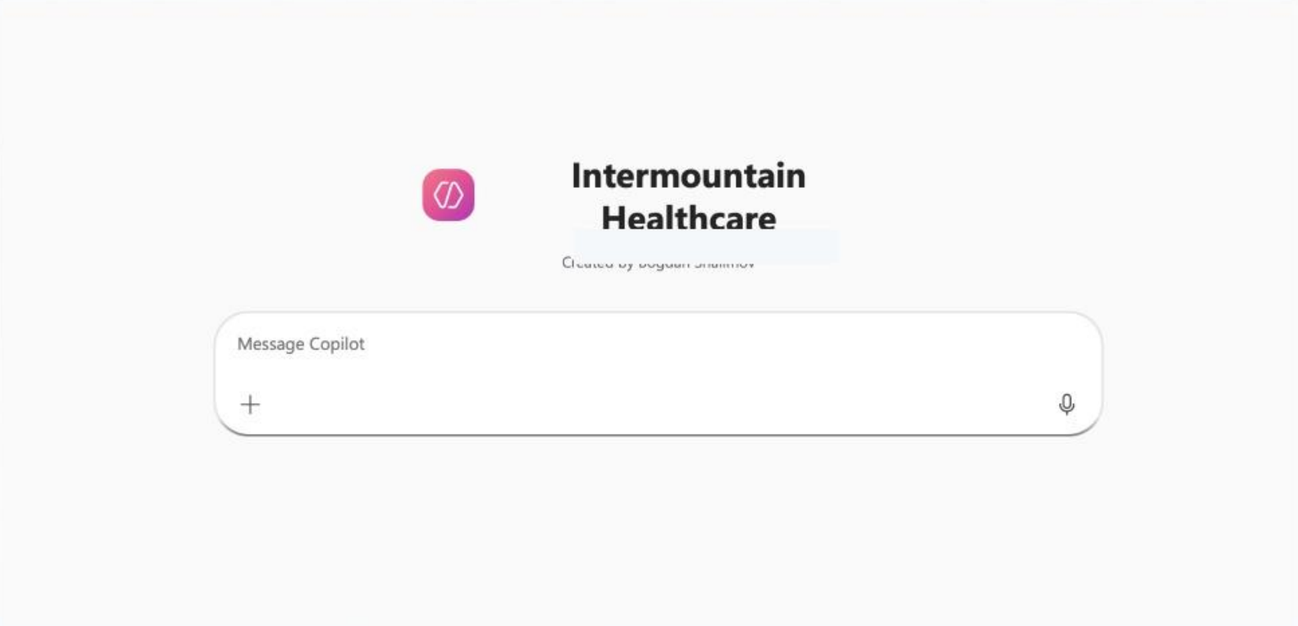


Automated Workflow

Approval triggers confirmation emails and status tracking, replacing manual follow-up.

Made with Prezi

Meet Your AI Intake Agent



- Natural Language Understanding: Extracts structured data from conversational free text.
- Intelligent Branching: Asks only relevant questions based on fulfillment type selected.
- Validation & Flagging: Catches short lead times, missing fields, and unrealistic quantities in real time.
- Auto-Summary Generation: Writes a plain-English event summary stored for admin review.

Made with Prezi

See It In Action: A Live Demonstration

Community Partner submits via our AI chatbot.

Request appears instantly in the admin queue dashboard.

Admin approves; confirmation and updates sent automatically.

Hi, my name is Josh, I would like to request an event for 130 kids in Lehi

Intermountain Healthcare 1:51 PM

Gathered initial event details • 6 seconds

Josh wants to request an event for 130 kids in Lehi. I need to gather more details about the event, including his contact information, event specifics, and materials needed. I'll ask for the following information: email, phone number, organization name, event name, event date, event zip code, request type (staff support, mailed materials, or pickup), materials requested, program type, and any special notes. This will help me create a complete request.

Using tool: **storeRequestDataInDB**

Hi Josh! It's great to hear that you're planning an event for 130 kids in Lehi! Just a few quick things to help me complete your request:

1. **Email Address:** What's your email?
2. **Phone Number:** Can you provide your phone number?
3. **Organization Name:** What organization are you representing?
4. **Event Name:** What would you like to call the event?
5. **Event Date:** When is the event scheduled to take place? (Please provide in YYYY-MM-DD format)
6. **Event Zip Code:** What's the zip code for the event location?
7. **Request Type:** Is this request for staff support, mailed materials, or pickup?
8. **Materials Requested:** What materials or resources do you need?
